

Finnova presents 5G-DiGITs in Brussels to prepare the 5G generation for Europe's digital future

The project, funded by Erasmus+, aims to close the digital skills gap and drive innovation in Europe.

Brussels, March 27th , 2025. Today, the **Finnova Belgium** headquarters hosted the **Young Training Meeting**, an event bringing together students, entrepreneurs, and experts to discuss the future of employment, digitalization, and technological innovation in Europe. At the event, **Gemma Mani**, EU Project Assistant at Finnova, presented **5G-DiGITs**, a cutting-edge project designed to prepare Europe for the 5G era by addressing the digital skills gap and equipping the next generation of professionals with the tools they need to succeed.

5G-DiGITs, funded by the **Erasmus+ program**, is a 36-month project with a total budget of **€1,745,421**. The project aims to foster the development of digital and sustainable skills, connect academia with the tech industry, and create new opportunities for young people in the rapidly evolving job market.

“This project is more than just a technological initiative – it’s a bridge to future employment opportunities and a sustainable digital economy,” said **Gemma Mani**, EU Project Assistant at Finnova. “By training young professionals in digital skills, we are not just preparing them for 5G, but for the entire digital transformation taking place across Europe.”

The **5G-DiGITs** project involves a consortium of prestigious universities, companies, and technology centers, including: **Involve Entrepreneurship, Universidad Politécnica de Valencia, National and Kapodistrian University of Athens, Infolytis, University of Karlstad, Technical University of Crete, Inercia Digital, CNC, Finnova, A8, Techn, and F6S.**

The goal of the project is to empower the next generation of workers with the skills needed to excel in the 5G-driven digital economy, focusing on creating sustainable solutions that will enhance Europe's competitiveness on a global scale.
