

5G-DiGITs hosts key webinar on the future of 5G skills and workforce development in Europe

The banner features the title "5G S HERE. ARE YOU READY?" at the top. Below it, a "LIVE WEBINAR" badge is next to the subtitle "Connected Skills: Shaping the 5G-Ready Workforce Together". The event details are listed: "Monday, May 12th, 2025" and "14:00 - 15:00 CEST". Key features include "The must-have skills for a 5G-ready workforce", "Exclusive insights from industry & education leaders", and a "Live discussion". A "REGISTER NOW" button with a QR code is on the right. The 5G-DiGITs logo is in the center, and a row of partner logos is at the bottom, including Incedigital, CNC Solutions, FITOS, AS, FGS, envolve, INF LYSIS, and TECHIN. The European Union logo is also present, indicating co-funding.

Experts to discuss how train the Next Generation of digital talent in a job market driven by 5g the next Monday, 12th May 2025

Brussels, 8th April 2025. On Monday 12th May 2025, at 14:00 CEST, the European project 5G-DiGITs will host an exclusive webinar to analyze the most in-demand 5G skills, workforce needs, and key strategies to prepare future professionals. The event will bring together industry leaders, educators, and policymakers, offering a unique opportunity to gain first-hand insights into how 5G is reshaping the job market and offering a roadmap for collaboration between industry and academia to co-create relevant, future-ready training aligned with emerging 5G applications.

The webinar will feature specialized presentations, expert discussions, and interactive Q&A sessions, providing strategic insights into the adoption of 5G in sectors such as healthcare, manufacturing, smart cities, and sustainability.

This webinar will unveil key findings from a European-wide needs assessment, and demonstrate how these insights are being translated into new modular, interdisciplinary courses for 5G-related fields

5G is more than just faster connectivity; it is a key enabler of digital transformation across multiple industries. Its integration with real-time automation, artificial intelligence, and advanced interconnectivity is redefining professional roles and creating new job opportunities.

In this context, training and adapting curricula are crucial to ensuring that Europe remains at the forefront of the digital and green transition.

About 5G-DiGITs

5G-DiGITs is a European project co-funded by the Erasmus+ program, running for 36 months (starting November 1, 2024) with a total budget of €1,745,421. Its mission is to train the next generation of 5G professionals, aligning education and training with labor market demands.

The consortium includes 12 key partners from the technology, education, and business sectors: Envolve Entrepreneurship, Polytechnic University of Valencia, National and Kapodistrian University of Athens, Infolyxis, Karlstad University, Technical University of Crete, Inercia Digital, CNC, Finnova, A8, Techin, and F6S.

Together, they work to identify skill gaps, develop innovative educational programs, and strengthen collaboration between industry and academia.
