**REGISTER NOW**

Co-funded by the European Union

**Brussels, 28th April 2025.** The 5G-DiGITs project celebrates the Global Action Week for Education. In this context of fostering the right to education, the project will host an online webinar the next 12<sup>th</sup> of May called “Connected Skills: Shaping the 5G-Ready Workforce Together”. The goal of this webinar is to analyze the most in-demand 5G skills, workforce needs, and key strategies to prepare future professionals.

Attendants will have the opportunity to receive exclusive insights of the 5G-DiGITs project, to learn about the key competencies that are transforming the 5G job market, to join live discussions, to share insights and network with key players in digital transformation.

This online webinar is free and open to the public. The registrations for this event are still open. For more information and registration, click the following link: <https://www.eventbrite.es/e/connected-skills-shaping-the-5g-ready-workforce-together-5digits-tickets-1311876661409?aff=oddtcreator>

## **Global Action week**

This week was created and celebrated for the first time in 2001 by the Global Campaign for Education. Since then, every final week of April several organizations, civil society movements and schools from all over the world mobilise to work for the right to education.

This week aims to inform the media, the education community, the society and political representatives about the importance of achieving change and realising the right to education around the world. As an education project, 5G-DiGITs is committed to the development of future digital skills, and it stands for the right to education worldwide.

## **About 5G-DiGITs**

5G-DiGITs is a European project co-funded by the Erasmus+ program, running for 36 months (starting November 1, 2024) with a total budget of €1,745,421. Its mission is to train the next generation of 5G professionals, aligning education and training with labor market demands.

The consortium includes 12 key partners from the technology, education, and business sectors: Envolve Entrepreneurship, Polytechnic University of Valencia, National and Kapodistrian University of Athens, Infolysis, Karlstad University, Technical University of Crete, Inercia Digital, CNC, Finnova, A8, Techin, and F6S.

Together, we work to identify skill gaps, develop innovative educational programs, and strengthen collaboration between industry and academia.
