

Huge success of the first Brokerage event of 5G-DiGITs

- *About 50 people attended the event that took place in Dublin*
- *The meeting was a great opportunity to discuss the future of 5G in Europe*

The poster for the 5G-DiGITs Brokerage Event in Dublin features a green and blue color scheme with a circuit-like background. The main title '5G-DiGITs Brokerage Event in Dublin' is in large green letters. Below it, a calendar icon shows 'May 26' and the date 'Monday, May 26th, 2025, 6:30pm - 8:00pm'. A location pin icon indicates 'Tcube Coworking - 1 O'Connell Street Lower, Dublin'. A prominent blue button with white text says 'REGISTER NOW'. To the right, there's an illustration of two people on a city street with a large '5G' logo and a Wi-Fi symbol. Above this, the '5G-DiGITs' logo and the European Union flag with the text 'Co-funded by the European Union' are visible. At the bottom, a row of logos includes inerciadigital, CNC Solutions, Finnova, A8, F6S, envolve, UNIVERSITAT POLITÈCNICA DE VALÈNCIA, INFOLYSIS, TECHIN, and TECHNISCHE UNIVERSITÄT CHEMNITZ.

Brussels. 28/05/2025. The first Brokerage event of the 5G-DiGITs project was a total success. The event was held in Dublin, in the Tcube coworking and gathered around 50 attendees to discuss the future of 5G in Europe. It was a highly productive networking day with a very participative audience.

The meeting started with the presentation of the project lead by Felipe Taylor Murta, Communication Manager at F6S, the project partner that hosted this networking event. Murta explained the project's objectives, partners, tasks, etc, to the wide audience that attended the event. After that, in the roundtable Elaine Burke (freelance Journalist), Gerry McKenna (tech executive) and Alison McMurtrie (Angel Investor) discussed investment opportunities and challenges for advanced technologies startups. It was an interesting talk where Burke, who was the moderator, would ask questions to the speakers and they would answer back.

Next, Joe Coolican made a vision of how the future of 5G may look like. There was a huge and productive participation from the audience and many interesting ideas came up. It ended up being a conversation between Coolican and those attending the event.

To conclude the event, an open discussion about the future of mobile tech in Europe was carried out to encourage participation from the public. Felipe Taylor Murta, who was the moderator of the event, shared a Slido with questions for the audience and all of them were participating and being part of the conversation.

This very first Brokerage event of 5G-DiGITs was framed within the 2nd consortium meeting of the project that took place in the same venue and date. The Brokerage event was held just after the first day of the meeting, the 26th of May, before the partners would meet for the second time the following day, May 27th.

About 5G-DiGITs

5G-DiGITs is a European project co-funded by the Erasmus+ program, running for 36 months (starting November 1, 2024) with a total budget of €1,745,421. Its mission is to train the next generation of 5G professionals, aligning education and training with labor market demands.

The consortium includes 12 key partners from the technology, education, and business sectors: Envolve Entrepreneurship, Polytechnic University of Valencia, National and Kapodistrian University of Athens, Infolysis, Karlstad University, Technical University of Crete, Inercia Digital, CNC, Finnova, A8, Techin, and F6S.

Together, we work to identify skill gaps, develop innovative educational programs, and strengthen collaboration between industry and academia.
