

## JOIN THE 5G-DIGITS EU-FUNDED ACCELERATOR PROGRAMME

**10<sup>th</sup> JUNE, 2026**  
CALL OPENS

**OCT 2026**  
PROGRAMME STARTS

**Sign Up  
to the form!**

Join the 5G-DiGITS EU funded Accelerator and gain direct access to real business challenges, expert mentoring, and growth opportunities.

Join the challenge. Innovate with industry.  
Accelerate your startup.

**Shape the Future of Innovation: Join the EU-Funded 5G-DiGITS Accelerator, which will officially launch its open call for early-stage startups and entrepreneurial teams across Europe on 10 June 2026.**

### **Brussels, 4 June 2026 – SAVE THE DATE!**

The EU-funded Erasmus+ project **5G-DiGITS** is launching a new opportunity to foster innovation, entrepreneurship, and industry collaboration in the field of 5G and advanced digital technologies. On **10 June 2026**, the project will officially open applications for its **Accelerator Programme**, inviting student-led startups from across Europe to develop innovative solutions to real-world challenges faced by established companies and organisations.

The Programme will bring together **25 student-led startups and a group of industry Challenge Owners** who will present concrete business and technological challenges requiring fresh perspectives and innovative approaches. Through a structured acceleration journey, participating startups will work closely with these organisations to design, test, and validate solutions that address their real operational, digital, or sustainability needs.

**Starting in October 2026**, the accelerator will provide innovators and entrepreneurs with the opportunity to apply their skills and creativity to real market demands while gaining valuable industry exposure, mentorship, and networking opportunities. At the same time, participating organisations will benefit from access to emerging talent, innovative ideas, and cutting-edge approaches to problem-solving.

The Programme aims to create **impactful collaborations** between startups, higher education institutions, and industry, helping to **transform promising ideas into practical solutions** for **today's digital and 5G-enabled economy**.

## **5G-DiGITs Accelerator Programme Overview**

**Open Call launch: 10 June 2026**

**Digital Info Day: June 2026**

**Between June and September 2026**, industry organisations acting as Challenge Owners will work on defining the challenges and developing the project briefs for the Accelerator's participants.

**From October 2026 to January 2027**, the Accelerator-selected teams will take part in workshops, mentoring sessions, and solution development activities.

Finally, the Programme will conclude in **January 2027** with a **Demo Day**, where participants will pitch their solutions to challenge owners and investors.

**More information and details will be announced soon. So stay tuned via our digital channels:**
